### California

State agencies must consider the emissions performance of suppliers when procuring steel, flat glass, and mineral wool insulation for state infrastructure projects.

The state must achieve a 40% reduction in cement emissions by 2035, and net-zero by 2045, relative to 2019 levels.

 Enacted

CARB must also develop a framework for measuring and reducing the embodied carbon of building construction materials, primarily at the materials production stage, and can utilize an embodied carbon trading system as a potential path to achieve the required GHG reductions.

- [SB 596 \(2021\)](#)
- [AB 2446 \(2022\)](#)
- [AB 43 \(2023\)](#)

### Colorado

Public construction projects must meet clear environmental criteria for the use of seven common construction materials, such as cement, glass, and steel.

Colorado also has a sales and use tax exemption for low-emission building materials, including green concrete, recycled steel and composite wood products.
