

STATUS	POLICY	POLICY AREA	POLICY CATEGORY	YEAR ENACTED
Enacted	Residential Energy Codes The statewide energy code for residential construction is 2015 IECC with amendments. Establishing Policies • West Virginia State Energy Code (2022)	Buildings and Efficiency	Building Codes	2022
Contracted Enacted	Commercial Energy Codes The statewide energy code for commercial building construction is ASHRAE 90.1 2013. Establishing Policies • West Virginia State Energy Code (2019)	Buildings and Efficiency	Building Codes	2019
Not Enacted	Stretch Building Energy Codes Stretch building energy codes are an optional, more stringent building code established by the state that local jurisdictions can adopt to require that newly constructed buildings are more efficient than the baseline state codes.	Buildings and Efficiency	Building Codes	
Not Enacted	Appliance Standards Appliance standards set minimum energy and water conservation requirements for appliances and equipment.	Buildings and Efficiency	Building Standards

STATUS	POLICY	POLICY AREA	POLICY CATEGORY	YEAR ENACTED
Not Enacted	Building Performance Standards Building performance standards establish energy and/or greenhouse gas performance targets for existing buildings in a state. These targets increase in stringency over time, leading to efficiency improvements in buildings to conserve energy and reduce emissions.	Buildings and Efficiency	Building Standards	
Not Enacted	Clean Heat Standards Clean heat standards establish a performance standard requiring heat providers to deliver a gradually- increasing percentage of low-emission heating services to customers.	Buildings and Efficiency	Building Standards	
Not Enacted	Energy Efficiency Resource Standards (EERS) Energy efficiency resource standards (EERS) establish targets and deadlines for utilities to reduce electricity demand through efficiency or "demand side" programs.	Buildings and Efficiency	Building Efficiency	
	Property Assessed Clean Energy (PACE)	Buildings		

Property assessed clean energy (PACE) allows residential and/or commercial property owners to finance efficiency upgrades with loans tied to the property.

All-Electric Buildings

Not Enacted All-electric buildings policies require new buildings to be constructed with allelectric heating, cooling, and cooking systems to transition away from fossilfuel use in buildings.
